# Kannan Panchangam Definisions

## Almanac (Panchangam)

The Kannan Almanac is calculated, according to Malaysian Standard Time, along with Kuala Lumpur's latitude, longitude and sunrise. So Tithi, Nakshatram starting times and ending times, the festivals, fasts, special occasions, sirarththa Tithi, Tithithvayam, avamakam, thirithinaspruk, and many items are slightly different from the Indian almanacs. But this is correct according to Malaysian time. The Kannan Panchangam is a souramana panchangam (Solar). The chandramana (lunar) months also given for chandramana folowers. Suklapatcham is referred to as sutham and Krishna patcham as pakulam.

## Vakkiyam, Dhirukkanitham

Kannan Panchangam is predicted in two methods as Vakkiyam and Drikkanitham. Drikkanitham is the time at which the Nakshatram ends, and the planetary positions are the only ones that are proven to be accurate. The Drikkanitham Almanacs are published on behalf of the Government of India and Srikanchi Sankaramadam. Drikkanitham is practiced all over the countries of the world where Hindus live. A mathematical system that came between the Vakkiyam almanac. That is not accurate. Therefore, horoscopes for human beings, fortune-telling, auspicious ceromonies like marriage, housewarming, annual Shraddha Tithi, fastings, and temple special occasions are to be observed according to the Drikkanitham.

## Dates

The Tamil date in the Almanac is the period from sunrise on that day to sunrise on the next day. The English date is from 12 midnight on the first day according to the Tamil date to 12

midnight on the next day of Tamil date.

## Tithi, Nakshatram

The end times of the Tithi and the Nakshatram in the almanac are given in hours, minutes and given at the next column in Nazhikai, vinadi. After that time the next tithi and the Nakshatram begins. The hour (small) 'am' represents the Tamil date from sunrise on that day to eleven fifty-nine in the morning. The period from twelve o'clock to eleven fifty-nine in the night is represented as 'pm' and then from twelve o'clock at night to before sunrise the next day (capitol) AM (next date according to the English date).

## Amirthathi Yogam

If only one yoga is given in a day, that yoga is for the whole day from sunrise to sunrise of the next day. If 2 yogas are given, the first yoga will end with the time from sunrise to the end of the given Nakshatram on that date. After that when the next Nakshatram starts the second given yoga starts and lasts till sunrise the next day. If given three yogas the first yoga of the day will be over with the end of first Nakshatram. The second yoga will end with the end of the second Nakshatram. After that the third yoga starts and lasts till the next day's sunrise.

## Determining of Fasting (Vrathas) and Festivals

There are separate rules for each fast and festival to determine them. Fasting and festivals are determined according to those rules and Malaysian time. So not only will they change, but so will the Tithithvayam, the thirithinasburg, the avamagam and so on.

## How to use Kannan Panchangam

### CALCULATE LAGNA IN OTHER CITIES

For those born in cities other than Kuala Lumpur horoscopes do not change totally. Tithi, Nakshatram, kiraka phathasaram and daily planetary positions are not change in the horoscopes from city to city. Only Lagna will adapt to the city. Find the sunrise time difference between Kuala Lumpur and the city from Sunrise difference table. Then Adding or subtracting the difference with lagnam starting and ending time of that city. It to be found from the Lagnam ending time chart.

Date of birth 16.02.202, Time 09.12 am.  
Location - Penang

According to page 133 Kumbha Lakshman ends at 09.09 am. After that Meena Lagnam starts and ends at 10.57 in the next phase. If the child is born in Kuala Lumpur, the child's sign is Pisces. Since the place of birth is Penang, the difference between Kuala Lumpur and Penang is (+8) minutes (page 169) and adding the difference (+8) minutes to given Lagnam ending time to Kuala Lumpur  $9.09 + 0.08 = 09.17$  (am). I.e. Kumbha Lakshman is there till 09.17 am in Penang. Only then will Meena Lagnam begin. The baby was born in Penang at 09.12 am before the end of Kumbha Lagnam, hence the sign of the baby born in Penang is Kumbham. Like this, if child is born around the end time of Lagna, sometimes Lagnam has a chance to change.

The city of Sandakan (Sabah) must subtract its February difference (-63) minutes (- 1 hour 3 minutes).

Kumbha Lakshman ends with 09.09 (-)  $1.03 = 8.06$ . After that Meena Lakshman has started. Hence Meena Lagnam for the baby born in Sandakan.

**Parabhava - Kannan Panchangam**

For those born in smaller cities where the sunrise does not make a difference, take the city next door. There will be no big difference.

### GOOD TIMES, RAHUKALAM.

Good times, Rahu Kalam etc. cannot be used in common time throughout the year. They have to be calculated by calculating the day length according to the daily sunrise and sunset of the respective city. The daily sunrise and sunset of Kuala Lumpur are given in the almanac. There is also a difference of how many minutes in which month it is from Kuala Lumpur for other cities. With that, you can find the exact time for other cities by adding or subtracting the difference in sunrise of that city with Kuala Lumpur times. For that, the sunset of that city is also needed. Therefore, you can get the accurate good times and bad times for the major cities of Malaysia from Panchanga Author through WhatsApp. Kannan Panchanga provides free calendars and accurate times for the major cities of the world for every year. **+6 016 757 9395.**

### Souramanam:

Motion of sun is the base for souramanam. The time taken by the sun to change from mesham rasi (zodiac sign, niraayana mesham) to the next rishabam rasi is known to be a month called Chitthirai. From the day of entry of sun to that of rishaba is considered has the start of next month called Vaikasi. The dates of a month depends on the change that occurs on the sign. Some months have twenty nine days and some has thirty two days. One year has twelve months. That is 365 days 15 nazhigai, 31 vinadi and 15 tharparai, ie; 365 days, 6 hours, 12 minutes and 30 seconds. Kannan Panchangam cast in Souramana month, year calculation method following in Tamil Nadu.

## How to use Kannan Panchangam in other countries

The Kannan Almanac can be used not only in Malaysia but in all other countries of the world. You can use the times of Tithi, Nakshatra, Yogam, Karanam and Planetary Positions to add or subtract the hourly difference from Malaysia to other countries. In some countries summer time is one hour in some months. That should be taken into account as well. Example: Monday, 09.03.2027, page 94 is given as Prathamai 6.11pm, Poorattathi 12.28 pm. The difference between Sydney, Australia and Malaysia is usually (+) 2.00 hrs. But in December the summer time extends 1 hour. So that should add up to 3 hours. So Prathamai Tithi will be till 9.11 pm and Poorattathi will be till 3.28 pm. Difference between Chennai, India (-) 2.30. So be sure to subtract. So Prathamai tithi will end at 3.41 pm. The Poorattathi Nakshatram will end at 9.58 pm. The difference between London, England and Malaysia is (-) 8.00. Summer time in December is not current. So we have to subtract 8 hours. So Prathamai will end at 10.11 am and Poorattathi at 4.28 am. Lagna, Good Time, Rahu kalam, Horai, auspicious times are based on the sunrise and sunset of the respective country and city. Kannan Almanac is predicted by using Kuala Lumpur Sunrise as 7.00 am. The sunrise difference of other countries can be added or subtracted. But in European countries the sunrise, sunset, day length will be the month-to-month varies a lot. Therefore it is wrong to add and subtract the sunrise difference. Those countries have to find the sunrise, sunset, day length of their respective cities and calculate separately. Free calendar, accurate times for major cities in the world whatsapp: +6 0167579395.

## Marriage Dates 2026-28 Parabhava, Plavanga Vakya & Drik

**Subamuhurtha Dates (Auspicious):** The auspicious muhurtha days are calculated according to both the Vakya and Tirukannitham methods for the convenience of both panchanga followers. However, the dates and tithi, naksatras calculated according to the Tirukannitham Panchang and the auspicious days given based on them are the accurate. The Tithi and nakshatram in the Vakkiyam almanac are not accurate. It is not right to make marriages accordingly. The Auspicious times are completely different from the Indian calendars. The Subamuhurtha dates are given for the next year Plavana (2027-28) also. For easy understanding of ordinary astrologers and priests a grade number is given for auspicious days. Grade 1 and 2 are excellent. Grade 3 Medium days. Grade 4 is the not so good day though with the most flaws. Given that the current situation requires a large number of muhurtha days. Avoid them as much as possible. If other days are not possible, you can do it in those moments. The personal horoscope of the bride and groom, the rasi, the specific month, the nakshatram should be examined to determine the appropriate day. Especially not to get married under the bride's Jenma nakshatram. During the months of Aadi, Purattasi, Markazhi and Tuesdays and Saturdays are blind days (without eye) should not be married. It is necessary to avoid the Prathamai, Ashtami and Navami tithes.

**Night Auspicious Times:** Mostly at night Mukurtha Lagnam and planetary conditions are not good. However, night auspicious time are also provided considering the needs. Those who want to have only at night can choose this.

The dates in black letters with a white background are Muhurta dates by both Vakya and Drik.

The dates in white letters with a black background are Muhurta dates by Vakya Panchang only.

The dates in black letters with a light black background are Muhurta dates by Drikkanita only.

**Valarpirai, Theipirai (Sukla, Krishna paksham):** It is generally believed that waxing (sukla paksham) is good and waning (krishna paksham) is bad. But the days when the moon is bright and strong around to the full moon (pournami) are the best days to do good deeds like marriage and housewarming. Days around the new moon (Amavasai) without moonlight, dark are not good. Five days before full moon and also valarpirai (sukla paksham) and nearest to full moon is first grade. Ekadasi is better than Dasami, Duvatasi is better than Ekadasi. Although the waning after the full moon, the moon is bright and strong, so up to Panchami in the waning is second grade. In it, Duvithiyai is better than Thiruthiyai and Thiruthiyai is better than Panchami. Although waxing after the new moon is the third grade until Saptami. Panchami is inferior to Sashti, Sashti is inferior to Saptami. Fourth grade from Sashti to Chaturdasi in waning before the new moon. Saptami quality is lower than Sashti. That is, the quality will decrease as the Tithi approach the new moon. The quality will increase as the Tithi come closer to the full moon. In the Almanac, the netram (eye) is placed 2 and jeevan (life) is 1 on the days nearer to the Pournami. The netram is placed 0 and jeevan also is 0 on the days nearer to the Amavasai.

### Vakkiyam - Planetary Positions Chart at K L Daily Sooririse Time

Tamil date is from Sunrise in the morning to before Sooririse the next day. According to the Tamil date, the position of the planets at Sunrise is given daily. If any planet changes its Rasi on that day, must change the planet after the changing time in the Rasi. For example, the Moon is in the Rishaba rasi on Chiththirai month, date 4th. Inside the grid shows Mithuna moon at 3.38pm. Therefore, for a baby born before 3.38 pm on that day, the moon should be placed in the Rishabam Rasi. If the baby born after 3.38 pm, you have to change the moon and write in Mithuna Rasi. It is given as AM (Capital) means after 12 midnight. According to the English date it is the next date. Su means - Sooriyan, Mo-Moon, Ma-Mars, Me-Mercury, Ju-Jupiter, Ve-Venus, Sa-Saturn, Ra-Rahu, Ke-Kethu, R.S-Retrograde Start (Vakram), R.E-Retrograde End.

### Drkkanitam - Planetary Positions Chart at K L Daily Sunrise Time

Tamil date is from Sunrise in the morning to before Sooririse the next day. According to the Tamil date, the position of the planets at Sunrise is given daily. If any planet changes its Rasi on that day, must change the planet after the changing time in the Rasi. For example, the Moon is in the Rishaba rasi on Chiththirai month, date 4th. Inside the grid shows Mithuna moon at 3.38pm. Therefore, for a baby born before 3.38 pm on that day, the moon should be placed in the Rishabam Rasi. If the baby born after 3.38 pm, you have to change the moon and write in Mithuna Rasi. It is given as AM (Capital) means after 12 midnight. According to the English date it is the next date. Su means - Sooriyan, Mo-Moon, Ma-Mars, Me-Mercury, Ju-Jupiter, Ve-Venus, Sa-Saturn, Ra-Rahu, Ke-Kethu, R.S-Retrograde Start (Vakram), R.E-Retrograde End.

**Kula Dheiva Vazhibadu:** Gods and goddess worshiped by the ancestors of your father, forefathers (paatan, muppaatan) are said as kulatheivam. Worship them first, before visiting famous temples, marriages, housewarming functions, and starting new business. If your kulatheivam temple is in india, it is not compulsory to visit India. But it would be good if you visit there. For those who cannot go far, and those who donot know about them can do a kulatheivam Pooja at the time of Aadi and Thai month Fridays at your own place. Buy a new saree or a dothi. Twist it length wise and cross it (like this- Ω). Decorate it with kumkum, manjal, flower. Fruits, sweets and food are to be kept. With the guidance of family elders this is said to be performed. This Pooja when performed with brothers and other relatives (pangali) is very good.

**Note:** Of the above 11 matches, Rachchu poruththam (Mangalyam-Thali) and Yoni poruththam are the two most important. Also Dhinam, Ganam, Rasi matches are essential. If there are 6 or more out of 11 matches including Rachchu and Yoni then both have Nakshatra match. It is not good to have less than 6 without Rachchu and Yoni matching.

Marriage compatibility should not simply be a matter of looking at the stars of both boy and girl and deciding how much fits. The Dasa Junction should be decided by carefully examining the horoscopes of the two, planetary positions, life, health, marital systems, Mangalya strength, marital relationship matters, ability to have children and focusing on the dosha positions. Horoscope compatibility is more important than star compatibility.

There is no Nakshatra dosha for male horoscope. It is believed and observed that the first patham (foot) of Moolam star of the female affects the father-in-law, the first phase of Ayilyam affects the mother-in-law, and the first phase of Kettai affects the husband's elder brother, and the fourth phase of Visakam affects the husband's younger brother. But research shows that this is not the case. It is completely wrong to say that their lives are in danger and death because of the girl (bride) horoscope.

**Parabhava - Kannan Panchangam**

It is balanced if both has dosha. It is not good if one has dosha and the other doesn't. At the same time, both should not have the severe Mars dosha and serpent dosha associated with the malefic planets. Matching such horoscopes can then be a lifelong struggle and can even lead to separation or divorce.

It is completely wrong belief that their husband or wife will die because either of them has a Chevvai dhosham (manglik). If death happens it is the defect in their own horoscope with the life span and not the partner's Chevvai dhosham (manglik). If one has a Chevvai dhosham (manglik) the marriage may be delayed. One's marriage can be delayed or problems can arise in married life. If 2 or 3 bad planets like Saturn, Rahu, Ketu, Sun are associated with Mars in the Dhosha system, then divorce can happen. A few may become widows. For some, remarriage will happen. It involved their entire horoscope. It is a great sin to spoil the life of a young person by learning astrology halfway through and blaming it on faults.

**KALATHRA DOSHA:** Venus, the kalathra karakan, is placed in the Virayasthanam (12th place) to the kalaththira sthanathipathi (7th house lord), which is called kalathra dosham. Example: Aquarius (kumbam) is the kalathra (marriage) position (seventh house of the Simmam) for the ascendant Leo (Simmam lagnam). Its lord is Saturn. He is the 7th house lord (kalathra sthanathipathi) for Simma Lagnam. If Saturn is in the horoscope is in Taurus (rishabam) then Aries (mesham) is the Virayasthanam (12th house) for Taurus (rishabam). If there is Venus in it, it is called kalathra dosham. This flaw must also be taken into account. People with such horoscopes may also experience interruptions, delays, and marital problems. Of late, getting married after reaching an old age will not have much impact.

## Ruthu Palan (Girls Puperity)

Women's Puperity time are not likely to be accurate. Therefore, that Lagna will not be accurate. So it is not the way to write a horoscope or keep it and tell about the future life. Don't look for marital fit with it. The benefits mentioned in astrology are given below. You can leave it at that to see if the seasoned Tithi, the star, etc. are doing well. **Chevvai Dhosham:** It is a general rule that the presence of Mars at 2, 4, 7, 8, and 12 for Lagna is a sign of Chevvai dosha. The special rule is that for men 2, 7, 8 and for women only 4, 8, 12 Mars is bad. In its ruling houses Aries, Scorpio, exhalted house Capricorn and debilitate house Cancer do not have any dosha. There is nothing wrong with being with the Guru, being seen by the Guru, or being compust with the Sun. Those born in Kataka and Simma Lagna are not affected by Mars Dosha. If Gemini and Virgo are in the second place and Mars in the 2nd place is not a problem. Taurus, Libra is in the 12th place and if there is Mars in it, there is no fault. Aries, Scorpio is in 4th place and if it is Mars then there is no fault.

# Lucky Name Numerology

Numerology is a philosophy involving planets, numbers, and the English alphabet. In Numerology each planet has a number. Those numbers have letters. According to astrology, the numbers of the naturally good planets Guru, Venus and Mercury are 3, 6 and 5 respectively. Sun is the leading planet and therefore has the No. 1, leadership and some disadvantages. The Moon can grow and shine so number 2. The ups and downs. The numbers 8, 4, 7, 9 of the bad planets Saturn, Rahu, Ketu and Mars are generally not good numbers. So setting the name in good numbers and doing anything on those dates will make progress.

Body number or birth number is just the sum of the numbers on one's date of birth. Life number or rule number is the sum of all the numbers in his date of birth, month and year. The name number is the sum of the numbers for the letters in the name.

Date of birth of GANESAN is 24.10.2013.

The total  $2 + 4 = 6$  of the date is his body number.

$2 + 4 + 1 + 0 + 2 + 0 + 1 + 3 = 13$  Adding it again,  $1 + 3 = 4$  is his life number.

**GANESAN** Adding the numbers of the characters in it gives  $3 + 1 + 5 + 5 + 3 + 1 + 5 = 23$  plus  $2 + 3 = 5$  This is his name number.

6 is the number dominated by Venus and 4 is the number dominated by Rahu. For somebody, his body number and life number may be the right number to name. For somebody, the numbers of other planets may be yoga. Therefore, those who are born with different body numbers and life numbers are given appropriate numbers to give names, and not bad numbers.

**Lucky Number for the Name:** Add one's date of birth for the body number, sum of all the numbers in his date of birth, month and year for

**Parabhava - Kannan Panchangam**

life and look at the table to see what's the right name number for them.

Date of birth 23.06.2013

Body number:  $2 + 3 = 5$ . This is the number of Mercury. Life Number:  $2 + 3 + 0 + 6 + 2 + 0 + 1 + 3 = 17 = 1 + 7 = 8$

This is the number of Saturn. So he was born under the domination of Mercury and Saturn. He can be named to appear in the additional Mercury number 5 of the alphabet. It is not good to name Saturn number 8. Venus number 6 also can be named. The combination of 5 can be used to name the numbers 14, 23, 32, 41, 50, 59, 77 which can come with the sum 5. Or you can name the numbers 15, 24, 33, 42, 51, 60, 69 that come with the sum 6.

## Buy Car, Vehicles:

When buying a car, you need to add the vehicle number along with its letter numbers.

$JLW 5657 = 1 + 3 + 6 + 5 + 6 + 5 + 7 = 33 = 3 + 3 = 6$

## House, Shop, Office:

Street number is not important when buying a house. In case of vacancy, only the house number is sufficient.

LORONG 12, DOOR NO: 23, house number only  $2 + 3 = 5$

The number of the building (BLOCK) does not matter if it is an apartment. Add the floor number (FLOOR) and the door number (DOOR NO, UNIT NO). Because in some places the door count of our house is the same as the door count of upstairs and downstairs houses. But as the floor number changes so does the joint number.

Blk 24 # 12-29, i.e. 12th floor, 29th house.  $1 + 2 + 2 + 9 = 14 = 1 + 4 = 5$ .

## Hebrew Pyramid Method

The Hebrew Pyramidal Numerology is a unique number that acts as the root of a tree, hidden inside the bayonet. The name number is the lucky number and with the lucky number in the Hebrew pyramid alphabet is the best result. This is a method of adding the next two numbers and finding a digitized pyramid.

Example. Date of birth 12.06.2014. Body number 3, life number 7. The lucky numbers are 3 or 5.

**ANBARASAN = 3**

**152121315**

**67333446**

**4166781**

**573469**

**31716**

**4887**

**376**

**14**

**5**

Name number 3 and the Hebrew Pyramid number 5, both is lucky numbers. So this name is best according to the Hebrew Pyramid method for the date of birth.

# VASTU - MANAIYADI SASTHRAM

Vastu is the philosophy of where we live. Vastu can be fully followed only when building a new house. You can find architectural flaws in the house, office, business space, buildings, and factories and make some changes in the rooms and materials. Before buying a house that is being built and sold by someone else, you should consult a vastu specialist to see if it is better to buy a well-designed house with proper thalai vasal. Some changes can also be made during the renovation.

## Directions

Kizhakku - Indran - East, Thenkizhakku - Agni - SouthEast, Therkku - Yaman - South, Thenmerkku - Niruthi - SouthWest, Merkku - Varunan - West, Vadamerkku - Vayu - NorthWest, Vadakku - Kuberan - North, Vadakizhakku, Eesaanan - NorthEast.

Swami images should be placed facing east or north. It is not good to worship on the ground with decorative chapels like chariots made of heavy wood. In case of worship, it is obligatory to sit and worship without standing. Puja should be performed towards the north or east. The lamp should face north or east. When there is no separate room other than the bedroom, the curtain can be set to close at all time except when praying, without being open at all times.

Only quiet deities should be kept at home and worshiped. Angry faces are not good. Strictly ebony (karungkal) idols should not be kept in the house. Panchaloga idols should not be kept at home unless one is able to bathe daily in the morning, cook freshly and anoint, adorn and beautify the Swami. Those who can't even change flower every day should not buy Swami Pictures and pile them up at home and leave them idle. Vastu Purushar is an asura. Not a deity to be worshiped. He should not be worshiped at home with a beautifully drawn picture or machine.

## CASH BOX:

Heavy boxes of money, jewelry, bureau, and shelf should be set against the west wall in the southwest corner of the southwest room. Should be towards the east. It can also be placed northwards along the south wall. Do not place facing south or west. The east and southeast rooms are the most unfavorable.

## KITCHEN:

The kitchen in the south-eastern part of the house (Agni - heat) is special. The stove should be located in the southeast corner of the room. Stand facing east and cook. The stove should come in the southeast part of the kitchen if set in other parts in an impossible situation. The circulation of water for washing dishes should be located in the

## POOJA ROOM:

Isaniyam (northeast) of the house is best for the prayer room. North and northwest are optimal. Brahma part (middle), not good. Adjacent to the south or west wall of the room is a lightweight platform at a height above our waist in which

**Parabhava - Kannan Panchangam**

north-eastern part. Should not be variable. There should be no toilet upstairs or downstairs next to the kitchen.

### **DINING ROOM:**

The dining room is best located on the south side next to the kitchen. Being in the center of the house is not good. Not to be seen from the outside. Sit facing east and north to eat. Guests can sit and eat facing west and south.

### **BEDROOM:**

Bedroom is best located close to that of the west wall. The southwest, south, and west side are also good. The northwest room is good for children, young women, guests and the north side room is for children, the elderly and the northeast room is for patients, and the southeast room is not good for anyone in the house. The couple can head south to the bedroom and sleep with their legs stretched out to the north. Heads to the west and legs to the east, children and the elderly with their heads to the east and legs to the west. No one should sleep with head on north. In any room, in the southeastern corner of the fire (where the east-south walls meet), the bed should not be laid or anyone should lay their head down. The bedroom should not be overlooked. Pictures of water bodies such as sea, pond, river, waterfall in the room to be avoided.

### **STUDY ROOM:**

It is better for the students' study room to be on the north or west side. It is better for the reader to sit facing east or north. Do not place BIG glass or fish tank inside.

### **BATHROOM AND RESTROOM:**

Good for setting in northwest, west, and southwest parts. Bathing should be towards the east or north when bathing. Sit towards the south or north to excrete. The house should not be at

a crossroads or on the street. Animals such as pets, birds and fish should not be deprived of their freedom and kept indoors for our own enjoyment.

### **HOUSE WARMING:**

Housewarming during the months of Audi, Purattasi, Markazhi, Panguni and on Tuesdays and Saturdays. Guru, Venus should not be asthanga periods. His zodiac sign should not have chandrastama days. Building initiation should not take place while the wife is pregnant, in the year of marriage, or in the year of mourning. Applies not only to home but also to all start-ups like shop, office, factories.

### **DATES AND TIME FOR STARTING A NEW BUILDING:**

The last 18 + 18 = 36 minutes is the best time to worship Lord Vastu, the time of eating and tambulam. The exact date of the Kuala Lumpur is given below. The sunrise of the respective towns must be taken into account to calculate the hours and minutes. For example, on the 10th of April, the Kuala Lumpur Sunrise is 7.09 minutes. Penang difference (+4) in April on the Sunrise. Sunrise Difference Schedule if the city is Penang. Therefore, in the table below, you have to add 4 minutes with 10.03 am - 10.39 am, which means that the Vastu Manaikolum time in Penang on that day is from 10.07 am to - 10.43 am. The days and times of Vastu Puja are fixed every year according to the date of the Tamil month. Will not change.

Barani, Karthikai, Thiruvathirai, Ayilyam, Pooram, Pooradam, Kettai, Visakam, Chithirai, Swathi, Magam 12 stars will not come back if you pay on those days. Long distance travel can cause problems. Many difficulty in getting sick. It is better to avoid those days.

## Thyajyam:

Thyajyam in general means bad time. In Kannan panchangam the bad time for Nakshatram are given. For each star that time starts from 3<sup>3</sup>/<sub>4</sub> nalikai (that is 1½ hours) from the beginning time of thiyagiyam. The starting time of thiyagiyam is given in hour minutes. Do not start any good work, auspicious ceremonies like marriage, house warming at the time of thiyagiyam till 1½ hours is completed.

**Shraddha Tithi:** It is the Tithi for doing darpanas to be done to our late ancestors. It is calculated and determined according to the Tithi determination rule due to Aparanna kalam. Tithi starting and ending times (in nazhikai) and Shraddha Tithies are calculated based on Malaysia - Kuala Lumpur sunrise, sunset times. So it will slightly differ from the indian and other panchangas. The Tithi given in Kannan panchangam will be accurate and suitable for performing Shirartha (Darpanam, Moksha lamp). Shraddha Tithi must given from the cell called Shraddha Tithi in the Almanac. Do not pick the date in the cell that the Tithi ending time. Although Shraddha Tithi given both the Vakkiyam and the Drirukkanitham, the Drirukkanitham Tithies are correct. It is best to do Shraddha on those dates.

Wednesday, Thursday, Friday & Sukla patcha Monday.

### Days with One Eye:

Sunday, Krishna patcha Monday.

**Days without Eyes (Blind):** Tuesday & Saturday.

Days with two eyes are good for auspicious ceremonies like marriage, house warming ect. Days with one eyes are medium. Blind days (tuesday & Saturday) are very bad and can't do.

**Agas:** The period from sunrise to sunset is called day agas. Sunset to sunrise is called night agas. The good times, bad times, hora, mukuna velai, annam, mukurtham, etc. are calculated based on agas in various ways.

## Pancha Patchi Sasthram

One can be successful in life if one excels in one's profession, defeats the enemy, succeeds in court cases, lends, buys, joins a new office, performs operations, and devotes time conveniently to the famine.

There is one bird for those born in Sukla pakcha (valarpirai) according to one's birth star and another bird for those born in Krishna pakcha (theipirai) under the same star. That table is on the next page. For example, in Aswini, the Sukla pakcha is born to the wolf, and the Krishna pakcha is born to the peacock.

Each bird performs five occupations (activity) every 6 nazhikai, ie 2 hours and 24 minutes, respectively, from the first sunrise / sunset to the first is Eat, walk, rule, sleep, and death. In which death, sleep, walk, eat, and rule are better than one another, respectively. In this, death and sleep will bring bad results, walk will bring moderate benefit, and eat and rule will give good benefits. The things will succeed when we do during our Nakshatra bird in ruling and eating season. Medium benefit in walking. Those who do in death and sleeping

will fail. Hours are calculated as Kuala Lumpur Sunrise at 7.00 a.m. To know exactly, you have to add or subtract the difference between the daily sunrise.

### Padu Patchi

Some days, some birds do nothing professional. Lying down. Do nothing new in those days.

### Sub-Activity

Just as sub divisions in every vimsothari dasa of the planets come in, sub-activities have in every main activity of the bird in this science also. They do different sub activity in both Sukla pakcha (valarpirai) and Krishna pakcha (theipirai) as seen in the table.

### Friend, Enemy

Like the planets, birds have friendly and hostile (enemy) birds. Do not associate business with people who are hostile (enemy) to one another. Thus it is good to worship and communicate with the proper pooja of the Panchapatchi Yantra.

The planet that gives its Bhava prediction of the Pukthi in Mahadasa is called the Bothakan. The spoiler is the Vedagan, the planet that makes the pure prediction available is the sadhaka, and the planet Karagan is the one that makes the prediction available to enjoy. No changes in Dasa, Pukthi for Rahu and Ketu.

## Find Kala Chakkara Dasai Balance

Which Patham of the janma Nakshatram will have dasai in the respective star Patham as in the table. The total year (paramaayul) is divided by Nakshatra patha years and multiple by the past nazhikai in the Nakshatra patham is the past years of the dasai. Then can find the balance dasai. Running in that dasai and for the rest of the year other dasai will follow. Just like finding the dasai of the star (Vimsoththari), one can find the dasai, Puththi and andharam as the same way.

Manaporuththam for both Nakshatram is good along with marriage dasaporuththam.		

**Sharpha dosham:** The presence of Rahu or Ketu in Lagnam or in places 2, 4, 7, 8, 12 for Lagnam is sharpha dosham (nagathosham). Similarly, being with the moon or in the 2nd and 12th place also sharpha dosham. This can create problems in marriage, sexual relation and childbearing.

**Kala Sharpha dosham:** The capture of all the planets between Rahu and Ketu, including Lagnam, is called Kalasharpha dosham. So that will be a lifelong struggle. If something just comes out of a planet or Lakshman it is called Kalasharpha Raja Yoga. They will have difficulties until the age of 32 or 35 and good progress in life beyond that.

## Nakshatra Poruththam (matching) Tables for Marriage

`Y' means that the match is `yes' and `N' means that the match is `no'. Medium also given as Yes. Of these, Rachu fit (Mangalyam - Tali) and Yoni fit (sexual relations) are the two most important. Dhinam, Ganam, Rasi matches are also essential. If there are six or more matches in ten matches, including Dhinam, Rachu, Yoni, then both nakshatram have a nakshatram match. You can also approach the astrologer to study the horoscope analysis and see the matching. It is not good to get married if the Dhinam, Rachu and the Yoni are the three not matching. Horoscope compatibility is more important than nakshatram compatibility.

**Bramma Muhurtham, Abijith Muhurtham:** One day has 30 muhurtham. 15 during day and 15 during night. One muhurtham is 2 nalikai that is 48 minutes. It is calculated from the time of sun rise. 14th muhurtham of a night is called brahma muhurtham. That begins one hour and 36 minutes before sunrise, and ends 48 minutes before sunrise. If the sunrise is morning 7 o'clock then brahma muhurtham is before the sunrise of the next day that is 5.24 to 6.12 AM. It daily changes according to the sunrise. It is correct time to worship god, performing meditation, yoga and student studies. 8th muhurtham during day time is abijith muhurtham that is nearly 12:36 to 1:24. Slokas say that during brahma muhurtham 1000's of doshas and mistakes are reduced. It doesn't mean that if a child is born on this time will not suffer from any kind of doshas. Marriages are to be done during the given subamuhurtha days, after sunrise and in the given lagna time. For this purpose the subamuhurtha dates and time are given. Even though this is good time doing marriages and other good thing at this time is not advisable. This is an option only at times of unavoidable situations.
